INTRODUCTION

Congratulations for downloading this app from the [FXCM Apps](http://www.fxcmapps.com) store. Now you can begin customizing your trading experience with [FXCM](http://www.fxcm.com). Remember, this app only works with an FXCM account, so be sure to get yours today.

Need an FXCM account?

If you don't have an FXCM account, it only takes several minutes to request one. You can also sign up for a free \$50,000 demo account in a flash, which will let you use this app in a risk free environment. Here's how to get your FXCM account or free demo account:

- Visit <http://www.fxcm.com/fxcm-portal.html>
- Select your country of residence
- Navigate to the *accounts* section of our website and follow the instructions

What will you learn in this guide?

This guide explains how to install your app, how to activate it within FXCM's MetaTrader, how to adjust its parameters, and where to get support.

DOWNLOADING YOUR APP

Once you have completed the checkout process at the [FXCM Apps](#) store, you will be presented with your app download link. Clicking on that link downloads the files you need to use your app.

Where is My Download Link?

Your app download link is located in the “Your Order” section of the confirmation page that is displayed after you submit your order.

Click the download button to access your app files.

Your Order	
Item	Cost
1 Super Boost MA-Cross	\$0.00
Total: \$0.00	

How do I Access My Download Link at a Later Date?

If you need to download your app files at any time in the future, please refer to your original order confirmation email. That email was sent to you shortly after you submitted your order at the [FXCM Apps](#) store.

The email's subject line follows this format, “*order FXCM-XXX from FXCM,*” where the X's represent your unique order number.

Once you have located your order confirmation email, follow these steps to download your app files:

- Click on the web link in the email to view the order's details
- Locate the "Unlock Downloads" section of the web page
- Enter the credit card number used at the time of purchase if your app cost money (leave the credit card field empty if your app was free)
- Click the *Apply* button to retrieve your download link

If you have deleted or misplaced your order confirmation email, a representative at FXCM can resend a copy to you. Please use the [support form on the FXCM Apps website](#) for these requests.

INSTALLATION

The app files that you downloaded (see page 2) are contained within a [zip file](#) with the extension ".zip." The zip file must be [unpacked](#) to expose the files contained within it.

After unpacking the zip file you will see two files, an executable file named "setup.exe" that is used to install the app onto your computer and this PDF getting started guide.

Steps to Install Your App

Before you begin, please ensure that FXCM's MetaTrader 4 software is *not* running. Then follow these steps:

- Double-click the executable file called "setup.exe"
- Follow the installation instructions on your screen until you receive confirmation that the app has been installed successfully

SETUP AND PREFERENCES

Now that you have installed your app, you can begin using it with FXCM's MetaTrader 4 software. Remember, apps from the [FXCM Apps](#) store only work with FXCM accounts (see page 1). Also, you must use FXCM's MetaTrader 4 software. [Download it here](#)

Where is my app in FXCM's MetaTrader 4?

- Log on to FXCM's MetaTrader 4 software
- Locate the "Navigator" window
- Maximize the "Custom Indicators" folder (your app is there)

If installed correctly, your app will be in the Custom Indicators folder.

How do I use my app?

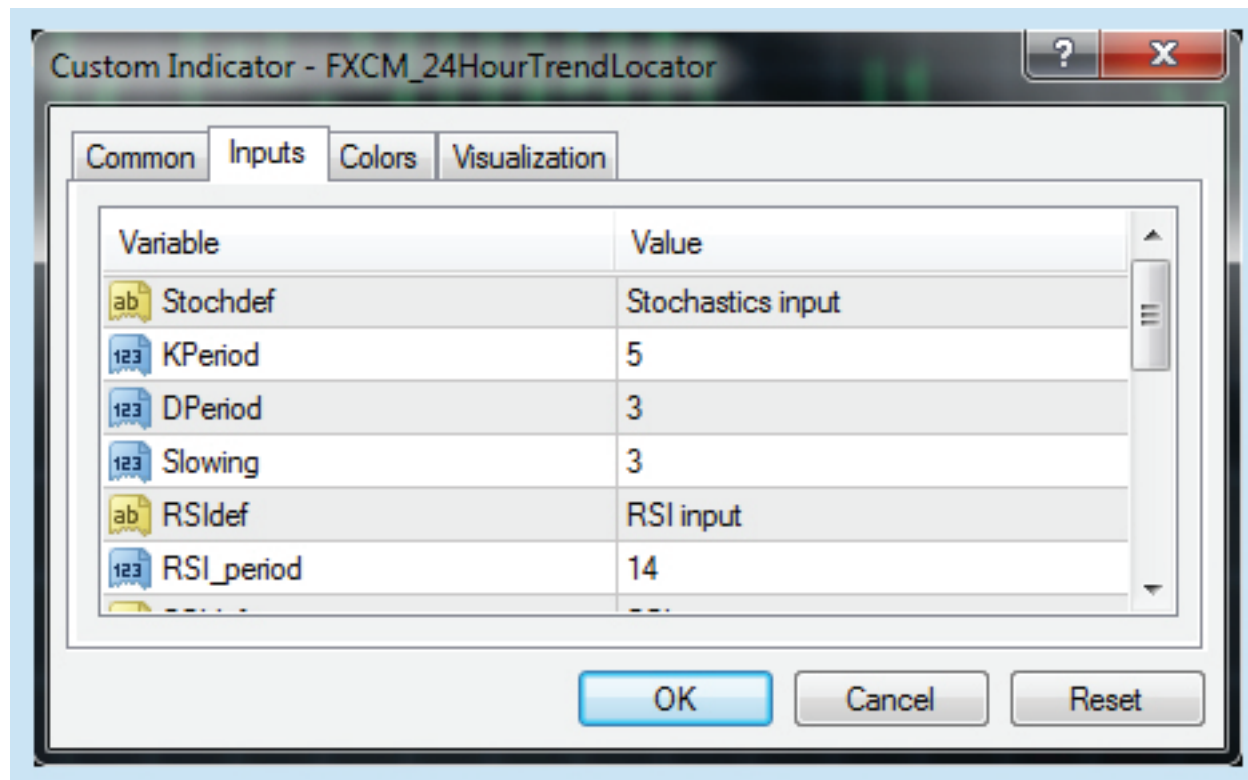

Locate your app in the "Custom Indicators" folder and click on its name; hold down your mouse button; drag the app to a chart; and then release your mouse button over the chart.

How do I adjust my app's parameters?

After adding an app to a chart, a properties window opens, allowing you to customize the app's inputs.

Here is an example showing an app's properties window.

- The *variables* column lists the type of inputs you can modify
- The *values*, which you can edit, control the variable's output
